KEY ACHIEVEMENTS

Full Stack Web Developer

"I learned full stack web development from the Evangadi scholarship and Dr. Angela AU.

DSA

I learned about arrays, linked lists, stacks and queues, sorting algorithms, search algorithms, and pointers.

COURSES

Data Structures and Algorithms

Web Development

Database

python programming language

Object-Oriented Programming

PASSIONS

Future Web3 Developer

SUMMARY

As a software engineering student at Addis Ababa University, I have developed a strong foundation in full-stack web development through the Evangadi Scholarship and Dr. Angela Yu's course on Udemy. I am eager to deepen my understanding of data structures and algorithms, as I believe these skills are crucial for writing efficient code and excelling in technical interviews. The A2SV program aligns perfectly with my goal of competing globally and pursuing opportunities in high-tech companies. I am excited about the chance to learn, collaborate, and grow within this innovative environment.
